FOR IMMEDIATE RELEASE

BEAN CASH CORE v1.3.1 RELEASED - MARKING MILESTONE

WORLDWIDE - May 24th, 2021 - Bean Core the developers of BEAN Digital Cash (BITB) have reached another milestone on their Sprint to update their core software and network, with the release today of Bean Cash Core v1.3.1.

This release combined with the recent major v1.3.0.0RC, weeks earlier, marks a major milestone, as this is the first time in over 6 years, that Bean Core has released two consecutive version updates to it's core software in the same month! Bean Core is continuing to demonstrate it's commitment to it's community and eco-system. Bean Core is on a rampage of development activity! Other major milestones , to be announced soon include the addition of a new exchange

(with more volume than all the current exchanges combined!) Further work continues on a Reddit TipBot, anticipated to be launched in the coming days! More Milestone Markers can be found on the website: <https://www.beancash.org> along with a more detailed RoadMap.

Current builds are available for Windows and Linux platforms, with Mac builds coming soon! Users can download the new v1.3 updated Bean Cash here:

<https://www.beancash.org/downloads.html>

Bean Cash has been operating continuously for over 6 years, on it's own block-chain and rock-solid network! Bean Cash pioneered the first v3 'Proof-of-Stake' crypto-currency. Block-chain integrity is one of the defining features of Bean Cash. Bean Cash offers an innovative Proof-of-Bean consensus system, allowing maintainers of the network to earn over 30% annually in Beans (BITB), offering a truly innovative monetary system that encourages savings while also providing incentives to maintain a strong, secure network!. Bean Cash was also the first to offer 20MB size blocks, allowing over 1,300 transactions per second while maintaining transaction cost at 1/1000th. of a cent!

"Fast..Simple..Secure..More Than Digital Cash!"
